ACADEMIC PROJECTS

Instant and Merchant flash Sale Monitoring System.

Online shopping in digital India, known for its time-saving advantages, offers a wide selection and easy comparison shopping. Merchants use flash sales to attract bargain hunters seeking the best prices. The online platform serves as a database for shop offers, playing a vital role. Flash sales create urgency, prompting quick decisions and satisfying transactions for both buyers and sellers. Shop owners leverage websites to convey information and promote sales, fostering a symbiotic relationship with users and enhancing the appeal of flash sales in the online marketplace.
